No. 3-A

FOUNDED 1836

The Army Medical Library was founded in 1836 by Dr. Joseph C. G. Lister, Surgeon General of the United States Army. It is the oldest medical library in the world and is located at Fort Detrick, Maryland.

The library is open to all members of the medical corps and to all medical students. It is also open to the public. The library is located in the Medical Department Building, Fort Detrick, Maryland. It is open from 8 a.m. to 4 p.m. daily.

The CURRENT LIST OF MEDICAL LITERATURE is for sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. Price: \$3.00 per year (\$3.75 foreign); 10 cents per single copy. All communications regarding subscriptions should be addressed to the Superintendent of Documents.

Published weekly by the ARMY MEDICAL LIBRARY, 7th Street & Independence Ave., S. W., Washington 25, D. C., as an intraservice publication of the Department of the Army. Lists articles of medical interest contained in current journals received. Subject index provided monthly. Exchange invited.

YEARLY BOUND VOLUME

C 1943

This index was prepared cooperatively by a staff recruited from various divisions of the Library. To expedite its publication, journals on Chemistry, Physics and Veterinary Medicine were eliminated as they were assumed to be adequately indexed in Chemical Abstracts and the Bibliography of Agriculture. Articles listed in the weekly issues under Anthropology, General, History, Bibliography, Biography and Nutrition were indexed selectively; however, articles with any possible medical significance were included. This index further differs from the usual form in that articles have been indexed on a title-word basis when the subject could be expressed in that way. Inconsistencies in terminology result from this procedure as the need for publishing this index was considered urgent.

Because of limitations of space, no cross references are included in the indexes to the CURRENT LIST. In order further to conserve space, the subject subdivisions used have been abbreviated wherever practicable. A list of the abbreviations adopted appears below:
